

GREEN PEDAL EXPRESS

100% Human-Powered Courier Service | Amsterdam

www.greenpedalexpress.nl

All prices listed are **excluding tax (Excl. BTW)**. A rate sheet including tax is available upon request.

BASE TRANSPORT RATES

Covers the first 10km. Final price is determined by whichever tier is higher (Weight or Volume).

Small / Standard Parcel	Small bags/boxes. Occupies less than 30% of rack space. (Up to 25kg)	€18.50
Large / Full Rack	Bulkier items, suit bags laid flat, or multiple crates. (30kg – 50kg)	€23.50
Heavy Duty / Oversized	Max volume/weight capacity. High-intensity flatbed hauls. (Up to 70kg)	€32.50

** Note: A 5kg weight buffer is maintained between tiers to account for estimates.*

DISTANCE & VOLUME SURCHARGES

Distance (Extended Zone)

Our base rates include the first 10km from pickup. For deliveries beyond the 10km zone:

Additional Distance: €1.25 per km

Volume & Handling (The "Flatbed Factor")

Our flatbed rack space is premium. Large, light items (like suits on hangers or oversized boxes) that occupy significant rack surface area are billed at the **Large / Full Rack** rate regardless of weight.

Multi-Piece Handling: €2.50 (Applies to 6+ individual items)

OPERATIONAL SURCHARGES

After-Hours & Weekend	Deliveries before 08:00, after 18:00, or Saturday/Sunday.	+30%
Wait Time	First 5 minutes included. Charged per 15-min increment.	€7.50

THE MANIFESTO

At Green Pedal Express, we believe that true sustainability isn't found in a charging port. It's found in the human spirit and the strength of the pedal stroke.

Today, big logistics companies are lulled into a false sense of progress. They trade diesel for lithium, believing that heavy four-wheeled electric vehicles or "e-bikes" are the ultimate solution. But a battery is still a footprint. Charging is still a cost. And a motor is just another machine that detaches the courier from the city they serve.

We choose a different path. We are **100% muscle-powered**. By rejecting electric assist, we remain the most reliable, lightweight, and truly zero-emission service in Amsterdam. We don't worry about battery range or hardware failures; we worry about getting your cargo to its destination with maximum efficiency and zero compromise.

While the giants get stuck in traffic with their "green" vans, we glide through the narrowest canals and bypass every restriction. We prove every day that human power is not a relic of the past, but the high-performance engine of the future.

Green by Name. Power by Nature.

100% Muscle — 0% Lithium
